

Epi Excellence at a glance

We provide pharmacoepidemiology research and strategy consulting, as well as project-based services and ongoing staffing support for life sciences organizations and observational research firms.

What can we do for you

- **Targeted or systematic literature reviews**, for regulatory (RMP, ODA, PIP, DAP, etc.), pharmacovigilance, clinical development, medical affairs, publication and other purposes
- **Epidemiology study support**. Study design, writing protocols, analysis plans, reports, publications, etc.
- **Staff extension**: Our scientists are able to step in as members of your epidemiology staff in case of work overload or staff leave.
- **Expert consultants**: Strategic and tactical brainstorming and program development, critique of publications, review and input to study or regulatory strategy and documents.

What sets us apart

- **Send it over, and we'll get it done**. Whether you need just a few hours of support or a series of large systematic literature reviews, we'll adapt our processes to meet your needs and expectations.
- **We don't pass the buck**. You will deal directly with Eileen and the scientists executing your project at all times. You can even interview and hand select your dedicated team.
- **Our experience is deep and broad**. Our team includes former staff epidemiologists from pharmaceutical companies, service providers, public health organizations and academia.
- **We're a small business**. Epi Excellence is certified as a Minority Business Enterprise and as a National Women's Business Enterprise, and was named as one of the Philadelphia area's fastest growing businesses in 2021 and 2022.

Leadership

Eileen E. Ming, MPH, ScD, FISPE, founded Epi Excellence following an extensive record of success as a pharmacoepidemiologist, epidemiologist, outcomes researcher, and leader in the pharmaceutical industry. She has worked across a variety of therapeutic areas, from pre-clinical to post-marketing phases.

Eileen holds an adjunct faculty position at the **University of Pennsylvania**, and degrees from **Harvard** (ScD in Epidemiology), **Johns Hopkins** (MPH), and **Stanford** (BA) Universities. She has been named a Fellow of the International Society for Pharmacoepidemiology.

Our Team

Our global, highly experienced, and multilingual team includes over 30 Doctorate and Masters level epidemiologists, as well as physicians, analysts, statisticians, medical librarians, and project managers.

Other professionals are incorporated into Epi Excellence teams as needed.
