Epidemiologic evidence delivered with **rigor, clarity, and sound judgment.**

WHAT WE DO

Epi Excellence develops rigorous, fit-for-purpose epidemiologic evidence to support confident decisions across medical affairs, regulatory, safety, clinical development, and market access.

WHY CLIENTS CHOOSE EPI EXCELLENCE

- Clear framing of the scientific and business need driving the research question
- Direct senior-level engagement from concept through final deliverables
- Methodological rigor paired with practical judgment
- Independent verification of evidence, not acceptance at face value
- Direct, responsive collaboration aligned to timelines
- Strength in evidence synthesis, interpretation, and scientific storytelling

HOW WE WORK

- Senior epidemiologist oversight on each project
- Structured processes with independent verification and rigorous quality review
- Direct collaboration with Epi Excellence scientific and strategic leads
- Flexible, responsive delivery aligned to real-world timelines

WHO WE ARE

- Experienced epidemiologists and scientists led by **Eileen E. Ming, MPH, ScD, FISPE**
- Backgrounds spanning pharma, biotech, CROs, academia, and public health
- Global consultants working directly with clients from strategy through execution

WHAT WE DELIVER

Literature Reviews and Evidence Synthesis

- Clear, defensible evidence summaries to support decision-making
- Integrated insights across study designs and data sources
- Transparent, well-documented methods and assumptions
- Alignment with stakeholder needs and expectations
- Identification of evidence gaps that inform next steps

Real World Evidence

- Study designs anchored in strong epidemiologic methods
- Analytic approaches that are well defined and tailored to setting
- Practical solutions reflecting real-world data and constraints
- Interpretation of findings in complex contexts

Medical Writing and Medical Communications

- Writing grounded in deep scientific and methodological expertise
- Clear, precise communication of complex evidence and methods
- Insightful interpretation linking evidence to context and decisions
- Evidence narratives that support scientific exchange

Specialized Epidemiology Support

- Independent perspective on complex or sensitive questions
- Senior guidance across scientific and regulatory contexts
- Objective review of methods, analyses, and evidence
- Scientific advisory support for high-stakes decisions

Flexible Staffing

- Immediate access to experienced epidemiology support
- Scalable capacity aligned to evolving needs
- Effective integration with internal teams
