Epidemiologic evidence delivered with **rigor**, **clarity**, and **sound judgment**.

WHAT WE DO

Epi Excellence develops rigorous, fit-for-purpose epidemiologic evidence that informs regulatory, safety, clinical development, medical affairs, commercial, and market access decisions across the product life-cycle

WHY CLIENTS CHOOSE EPI EXCELLENCE

- Clear framing of the scientific and business need driving the research question
- Direct senior-level engagement from concept through final deliverables
- Methodological rigor paired with practical judgment; inconsistencies pursued
- No minimum: from a few hours of work to a full project or ongoing support
- Responsive collaboration, with capacity scaled to meet real-world timelines
- Strength in evidence synthesis, interpretation, and scientific storytelling

HOW WE WORK

- Scope and methods agreed in writing before work begins; decisions documented
- Epidemiologists in place quickly, with specialists added as needed
- Interim findings shared and discussed as the work progresses
- Independent epidemiologist verification against sources; QC record delivered

WHO WE ARE

- Experienced epidemiologists and scientists led by **Eileen E. Ming, MPH, ScD, FISPE**
- 40+ professionals across nine countries, working in nine languages
- 600+ epidemiology projects delivered since 2014

WHAT WE DELIVER

Literature Reviews and Evidence Synthesis

- Clear, defensible evidence summaries to support decision-making
- Integrated insights across study designs and data sources
- Transparent, well-documented methods and assumptions
- Identification of evidence gaps that inform next steps

Real-World Evidence and Outcomes Research

- Study designs anchored in strong epidemiologic methods
- Analytic approaches that are well defined and tailored to setting
- Practical solutions reflecting real-world data and constraints
- Interpretation of findings in complex contexts

Medical Writing and Medical Communications

- Writing grounded in deep scientific and methodological expertise
- Clear, precise communication of complex evidence and methods
- Insightful interpretation linking evidence to context and decisions
- Depth and framing matched to the intended audience

Advisory and Specialized Analysis

- Independent perspective on complex or sensitive questions
- Senior guidance across scientific and regulatory contexts
- Objective review of methods, analyses, and evidence
- Background rates; SEER and other public-data analyses

Flexible Staffing

- Experienced epidemiologists without a hiring cycle
- Level of support adjusted as needs change
- Effective integration with internal teams
